NOTES ON THE CONTRIBUTORS

Aaran Burns is currently studying for his PhD in Philosophy at Keele University. His philosophical interests are primarily in the relation between contemporary epistemology and scepticism, moral and political philosophy, and the philosophy of religion. His other publications include: "A Phenomenal Conservative Perspective on Religious Experience" (*International Journal for Philosophy of Religion*, 2017) and "Introduction: Methods in Normative Political Theory/Philosophy˜ (with Ruhi Demiray, *Public Reason*, 2017). Contact: a.s.burns@keele.ac.uk.

Hossein Dabbagh is an Assistant Professor in the Philosophy program at Doha Institute for Graduate Studies and Adjunct Lecture at Institute for Cognitive Science Studies. He is also working as a consultant for Muslim Biomedical Ethics Project at Institute of Ismaili Studies. Prior to this, he was a visiting researcher at the department of Theological Ethics and Christian Social Ethics at Universität Luzern and research assistant at Oxford Centre for Socio-Legal Studies. He studied moral philosophy during his Doctorate journey at University of Reading and University of Oxford. In his PhD thesis "Mind, Epistemology and Neuroethics: A Defence of Epistemological Intuitionism," he defended an intuitionist epistemology from criticism drawn from empirical moral psychology. His most recent publications are: "Sinnott-Armstrong Meets Modest Epistemological Intuitionism" (*The Philosophical Forum*, 2017), "Intuiting Intuition: The Seeming Account of Moral Intuition" (*Croatian Journal of Philosophy*, 2018), "Feeling Good: Integrating the Psychology and Epistemology of Moral Intuition and Emotion" (*Journal of Cognition and Neuroethics*, forthcoming). Contact: hosein.dabbagh@gmail.com.

Simon Dierig is a Lecturer of Philosophy and a "Privatdozent" at Heidelberg University. He received his PhD from the LMU Munich and his "Habilitation" from the University of Heidelberg. He works mainly in epistemology, the philosophy of mind, action theory and the history of philosophy. He has published on Descartes' philosophy of mind, Berkeley's metaphysics, Moore's paradox and self-knowledge, the compatibility of semantic externalism and a priori self-knowledge, the individuation of actions and the role of the principle of charity in

interpretation. He currently works on anti-skeptical strategies in contemporary epistemology. His recent papers include "Moores Beweis, Wahrnehmung und Skeptizismus" (*Grazer Philosophische Studien* 94, 2017) and "Externalismus und Selbstkenntnis: Die McKinsey-Paradoxie" (forthcoming in *Zeitschrift für philosophische Forschung*). Contact: simon_dierig@yahoo.de.

Frank Hofmann is Professor of systematic philosophy at the University of Luxembourg since 2011. He did his PhD and habilitation at the University of Tuebingen, Germany. His areas of specialization include epistemology, the theory of rationality and reasons, philosophy of mind, metaphysics, philosophy of science, and philosophy of language. Ethics, meta-ethics, and action theory belong to his areas of competence. Contact: frank.hofmann@uni.lu.

Robin McKenna is a Lecturer in Philosophy at the University of Liverpool. His research interests lie mainly in epistemology (including social and feminist epistemology), but he is also interested in philosophy of language, philosophy of science and ethics. He has published several papers on these and other topics in journals including *American Philosophical Quarterly*, *Australasian Journal of Philosophy* (2x), *Episteme* (2x), *Ethics*, *Pacific Philosophical Quarterly* and *Synthese* (4x). He is currently working on a book on social dimensions of knowledge and papers on topics including the epistemology of climate change denial, feminist epistemology and social constructivism in epistemology. Contact: rbnmckenna@gmail.com.

John N. Williams is Professor in Philosophy in the School of Humanities and Social Sciences at Nazarbayev University. His research interests include paradoxes, epistemology and applied ethics. His most recent articles include: "There's Nothing to Beat a Backward Clock" (*Logos & Episteme*, 2016), "The Backward Clock, Truth-Tracking, and Safety" (with Neil Sinhababu, *Journal of Philosophy*, 2015), "Not Knowing You Know: A New Objection to the Defeasibility Theory of Knowledge" (*Analysis*, 2015), "Moore's Paradox in Speech: A Critical Survey" (*Philosophy Compass*, 2015), and "Moore's Paradox in Thought: A Critical Survey" (*Philosophy Compass*, 2015).
