

NOTES ON THE CONTRIBUTORS

Marcoen J.T.F. Cabbolet is a research affiliate of the Vrije Universiteit Brussel, who earned his Ph.D. in 2011. He works mainly on nonstandard approaches to open problems in the foundations of physics and the foundations of mathematics, with occasional excursions to analytical philosophy and research ethics. An overview of the research output can be found on <https://www.researchgate.net/profile/Marcoen-Cabbolet>. Contact: Marcoen.Cabbolet@vub.be.

Wai Lok Cheung works on the necessary a posteriori with his M.Phil. thesis at The Chinese University of Hong Kong, generating a counterpart theory of epistemic possibility using indistinguishability. His work is published in *Australasian Journal of Philosophy*, *Comparative Philosophy*, and *Journal of Comparative Literature and Aesthetics*. More can be found at <http://hongkonggray.com/>. Contact: hongkonggray@gmail.com.

Frank Coutelieris is a Greek Mathematician who has earned his Ph.D. in Applied Mathematics and Chemical Engineering from the University of Patras, Greece. He currently serves as a professor of Mathematical Modelling in University of Patras, in Greece. He has published articles on epistemology and the philosophy of science as well as many mathematical papers, available online <http://simulab.env.upatras.gr/people/1>. His main research interest lies in the involvement of mathematical proofs in the philosophy of science. His scientific record includes more than 70 publications in peer-reviewed journals, with more than 1200 citations. He is currently a reviewer and guest and regional editor for many scientific journals, while he is also a supervisor for many post-doc, doctoral, and post-graduated theses as well as more than 60 under-graduated theses. Contact: fcoutelieris@upatras.gr.

Xuanzi Fang is a PhD student at School of Philosophy, Renmin University of China, and a visiting doctoral researcher at COGITO, Epistemology Research Centre, University of Glasgow (2022-2023). Her main research interests are in epistemology and philosophy of mind. Contact: xuanzifang@gmail.com.

Virginia Grigoriadou is a Greek Philologist who earned her Ph.D. in History and Philosophy of Science at the National Technical University of Athens (Department of Humanities, Social Sciences and Law). She is currently a postdoctoral researcher at the University of Patras, Greece. Her research interest falls into the fields of History and Philosophy of Science and her research activity is mainly focused on the

investigation, analysis, and theoretical documentation of scientific tools, techniques, and mechanisms used during experimentation, such as the concepts of similarity and the scientific models, as applied in engineering. She has published articles on epistemology, philosophy of science, history of science, and ethics, available online at <http://simulab.env.upatras.gr/people/190> and <https://www.researchgate.net/profile/Virginia-Grigoriadou/research>. Contact: virgi.grigoriadou@gmail.com.

Benoit Guilielmo is a PhD student at the University of Zurich, a member of the *Zurich Epistemology Group on Rationality* (directed by Professor Anne Meylan) and of the *Groupe de recherche en épistémologie* (Collège de France, Paris). His main research interests are in epistemology and philosophy of mind. His main focus is on the metaphysical nature of different mental states and the topic of inquiry. Contact: benoit.guilielmo@uzh.ch.

Miguel López Astorga has a Ph.D. in Logic and Philosophy of Sciences from the University of Cádiz (Spain). That degree is validated by the University of Chile. His undergraduate studies were also carried out in Spain. He has a bachelor's degree in philosophy and education sciences (Philosophy section) from the University of Seville. He has a Teaching Degree for the High School Level in Philosophy from the University of Chile (this last degree was obtained by validation of the Spanish bachelor's degree). He carried out post-doctoral research on human reasoning, on the mental model theory, and on the logical forms of propositions, under the supervision of Professor Philip Johnson-Laird, who is currently Stuart Professor of Psychology, Emeritus, at Princeton University, and Visiting Scholar, Psychology Department, at New York University. Although he has worked in several institutions, at present, he is Full Professor and Researcher at the University of Talca (Chile). His latest research focuses on the human inferential activity. He is especially interested in the relations that can be found between syntax, semantics, and pragmatics in that activity. He also addresses the possible cognitive potential of some ancient logics, particularly, Stoic logic. Contact: milopez@utalca.cl.

Christopher Noonan received his PhD in Philosophy from the University of Warwick in 2022, and went on to teach at Nazarbayev University in Kazakhstan. He is interested in moral epistemology, metaethics, epistemic defeat and various issues in applied ethics. He has published papers on evolutionary debunking arguments in meta-ethics, moral knowledge, epistemic defeat and evidential underdetermination. Contact: cnoonan63@googlemail.com.
